

Package ‘waiter’

September 23, 2025

Title Loading Screen for 'Shiny'

Version 0.2.5.1

Date 2022-01-02

Description

Full screen and partial loading screens for 'Shiny' with spinners, progress bars, and notifications.

License MIT + file LICENSE

URL <https://waiter.john-coene.com/>,
<https://github.com/JohnCoene/waiter>

BugReports <https://github.com/JohnCoene/waiter/issues>

Encoding UTF-8

Imports R6, shiny, htmltools

RoxygenNote 7.3.3

Suggests httr, knitr, packer, rmarkdown

VignetteBuilder knitr

NeedsCompilation no

Attendant	<i>Attendant</i>
-----------	------------------

Description

Manage the attendant loading bar with bootstrap 4.

Active bindings

max Maximum value of the bar.

Methods

Public methods:

- [Attendant\\$new\(\)](#)
- [Attendant\\$inc\(\)](#)
- [Attendant\\$dec\(\)](#)
- [Attendant\\$set\(\)](#)
- [Attendant\\$done\(\)](#)
- [Attendant\\$close\(\)](#)
- [Attendant\\$auto\(\)](#)
- [Attendant\\$getMin\(\)](#)
- [Attendant\\$getMax\(\)](#)
- [Attendant\\$getValue\(\)](#)
- [Attendant\\$clone\(\)](#)

Method new():

Usage:

```
Attendant$new(  
  id,  
  min = NULL,  
  max = NULL,  
  session = shiny::getDefaultReactiveDomain(),  
  hide_on_max = FALSE  
)
```

Arguments:

id Id of progress bar set with [attendantBar].

min, max Minimum and maximum value of the progress bar.

session A valid shiny session.

hide_on_max Whether to hide the progress bar when it reaches its maximum value (defined in [attendantBar]). The progress bar automatically becomes visible again when it is set to a value below the maximum.

Details: Initialise a progress bar

Method inc():*Usage:*

```
Attendant$inc(value = 1, text = NULL)
```

Arguments:

value Value to increase the progress bar.

text Text to display on the progress bar.

Details: Increase

Method dec():*Usage:*

```
Attendant$dec(value = 1, text = NULL)
```

Arguments:

value Value to decrease the progress bar.

text Text to display on the progress bar.

Details: Decrease

Method set():*Usage:*

```
Attendant$set(value, text = NULL)
```

Arguments:

value Value to set the progress bar.

text Text to display on the progress bar.

Details: Set

Method done():*Usage:*

Attendant\$done(text = NULL)

Arguments:

text Text to display on the progress bar.

Details: Done with progress

Method close():

Usage:

Attendant\$close(text = NULL)

Arguments:

text Text to display on the progress bar.

Details: Done with progress

Method auto():

Usage:

Attendant\$auto(ms = 400, value = 1)

Arguments:

ms Milliseconds between increment of 'value'.

value Value to increment by at every 'ms'.

Details: Automatically increase the progress bar until done

Method getMin():

Usage:

Attendant\$getMin()

Details: Get minimum value

Method getMax():

Usage:

Attendant\$getMax()

Details: Get maximum value

Method getValue():

Usage:

Attendant\$getValue()

Details: Get current value

Method clone(): The objects of this class are cloneable with this method.

Usage:

Attendant\$clone(deep = FALSE)

Arguments:

deep Whether to make a deep clone.

Description

Create a Bootstrap 4 progress bar.

Usage

```
attendantBar(  
  id,  
  value = 0,  
  min = 0,  
  max = 100,  
  text = NULL,  
  color = c("primary", "info", "success", "danger", "warning"),  
  striped = FALSE,  
  animated = FALSE,  
  height = 20,  
  width = "100%",  
  class = "",  
  style = "",  
  bg_color = "#f5f5f5",  
  hidden = FALSE  
)
```

Arguments

id	A unique identifier for the progress bar. Used in 'Attendant' class for handling.
value, min, max	Initial value, minimum, and maximum values the progress bar can take.
text	Optional text to display on the progress bar. This can then be dynamically modified with 'Attendant'.
striped	Whether the progress bar should be striped.
animated	Whether to animate the stripe on the progress bar.
height	Height of the progress bar, numerical values are converted to pixels ('px' CSS), any other valid CSS size is valid too.
width	Width of the bar, defaults to '100' values (e.g.: '42') are converted to pixels ('px').
class, style	Additional style and class to pass to the parent wrapper of the progress bar.
bg_color, color	Color, and background color of the progress bar.
hidden	Set to 'TRUE' to initialise the attendant as hidden, it will be made visible when set to a value.

 autoWaiter

Automatic Waiter

Description

This function allows easily adding waiters to dynamically rendered Shiny content where "dynamic" means 'render*' and '*output' function pair.

Usage

```
autoWaiter(id = NULL, html = NULL, color = NULL, image = "", fadeout = FALSE)
```

Arguments

id	Vector of ids of elements to overlay the waiter. If 'NULL' then the loading screens are applied to all elements.
html	HTML content of waiter, generally a spinner, see spinners .
color	Background color of loading screen.
image	Path to background image.
fadeout	Use a fade out effect when the screen is removed. Can be a boolean, or a numeric indicating the number of milliseconds the effect should take.

Details

This will display the waiter when the element is being recalculated and hide it when it receives new data.

Examples

```
library(shiny)
library(waiter)

ui <- fluidPage(
  autoWaiter(),
  actionButton(
    "trigger",
    "Render"
  ),
  plotOutput("plot"),
  plotOutput("dom")
)

server <- function(input, output){
  output$plot <- renderPlot({
    input$trigger
    Sys.sleep(3)
    plot(cars)
  })
}
```

```
output$dom <- renderPlot({
  input$trigger
  Sys.sleep(5)
  plot(runif(100))
})
}

if(interactive())
  shinyApp(ui, server)
```

garcon

Garcon

Description

Create a garcon to animate images on the waiter.

Usage

```
useGarcon()
```

```
use_garcon()
```

Methods

Public methods:

- [Garcon\\$new\(\)](#)
- [Garcon\\$set\(\)](#)
- [Garcon\\$inc\(\)](#)
- [Garcon\\$reset\(\)](#)
- [Garcon\\$destroy\(\)](#)
- [Garcon\\$print\(\)](#)
- [Garcon\\$close\(\)](#)
- [Garcon\\$clone\(\)](#)

Method new():

Usage:

```
Garcon$new(
  image,
  bg_color = "#FFFFFF",
  opacity = 0.5,
  direction = c("bt", "tb", "lr", "rl"),
  filter = NULL
)
```

Arguments:

image The CSS id of the image tag.

bg_color Background overlay color in hexadecimal or RGB.

opacity Overlay transparency.

direction Animation direction. Possible values: 'lr' (left to right), 'rl' (right to left), 'bt' (bottom to top), 'tb' (top to bottom).

filter Filter to apply, options are 'blur', 'grayscale', 'sepia', 'hue-rotate', 'invert', 'opacity'.

Details: Initialise the garçon.

Examples:

```
\dontrun{Garçon$new("img")$set(30)}
```

Method set():*Usage:*

```
Garçon$set(value)
```

Arguments:

value Percentage to set to.

Details: Value to set the garçon to.

Examples:

```
\dontrun{Garçon$new("img")$set(30)}
```

Method inc():*Usage:*

```
Garçon$inc(value)
```

Arguments:

value Percentage to increase to.

Details: Value to increase the garçon to.

Examples:

```
\dontrun{Garçon$new("img")$inc(30)}
```

Method reset():*Usage:*

```
Garçon$reset(value)
```

Arguments:

value Percentage to set to.

Details: Reset the garçon to.

Examples:

```
\dontrun{Garçon$new("img")$set(30)$reset()}
```

Method destroy():*Usage:*

```
Garçon$destroy()
```

Details: Kill the garçon to.

Examples:

```
\dontrun{Garçon$new("img")$set(30)$destroy()}
```

Method print():

Usage:

```
Garçon$print()
```

Details: print the garçon

Method close():

Usage:

```
Garçon$close()
```

Details: Close the garçon.

Examples:

```
\dontrun{Garçon$new("img")$set(30)$close()}
```

Method clone(): The objects of this class are cloneable with this method.

Usage:

```
Garçon$clone(deep = FALSE)
```

Arguments:

deep Whether to make a deep clone.

Examples

```
## -----
## Method `Garçon$new`
## -----

## Not run: Garçon$new("img")$set(30)

## -----
## Method `Garçon$set`
## -----

## Not run: Garçon$new("img")$set(30)

## -----
## Method `Garçon$inc`
## -----

## Not run: Garçon$new("img")$inc(30)

## -----
## Method `Garçon$reset`
## -----

## Not run: Garçon$new("img")$set(30)$reset()
```

```

## -----
## Method `Garcon$destroy`
## -----

## Not run: Garcon$new("img")$set(30)$destroy()

## -----
## Method `Garcon$close`
## -----

## Not run: Garcon$new("img")$set(30)$close()

```

hostess

Hostess

Description

Add hostess dependencies.

Usage

```
use_hostess()
```

```
useHostess()
```

Methods

Public methods:

- [Hostess\\$new\(\)](#)
- [Hostess\\$start\(\)](#)
- [Hostess\\$print\(\)](#)
- [Hostess\\$set\(\)](#)
- [Hostess\\$inc\(\)](#)
- [Hostess\\$close\(\)](#)
- [Hostess\\$get_loader\(\)](#)
- [Hostess\\$set_loader\(\)](#)
- [Hostess\\$notify\(\)](#)
- [Hostess\\$clone\(\)](#)

Method new():

Usage:

```
Hostess$new(id = NULL, min = 0, max = 100, n = 1, infinite = FALSE)
```

Arguments:

id Id used in 'hostess_loader' if you generate the loader with the loader method you may leave this NULL.

min, max Minimum and maximum representing the starting and ending points of the progress bar.

n Number of loaders to generate.

infinite Set to TRUE to create a never ending loading bar, ideal when you cannot compute increments or assess the time it might take before the loading bar should be removed.

Details: Create a hostess.

Examples:

```
\dontrun{Hostess$new()}
```

Method start():

Usage:

```
Hostess$start()
```

Details: Start the hostess

Method print():

Usage:

```
Hostess$print()
```

Details: Print the hostess

Method set():

Usage:

```
Hostess$set(value)
```

Arguments:

value Value to set, between 0 and 100.

Details: Set the hostess loading bar.

Examples:

```
\dontrun{Hostess$new()$set(20)}
```

Method inc():

Usage:

```
Hostess$inc(value)
```

Arguments:

value Value to set, between 0 and 100.

Details: Increase the hostess loading bar.

Examples:

```
\dontrun{Hostess$new()$inc(10)}
```

Method close():

Usage:

```
Hostess$close()
```

Details: Close the hostess

Examples:

```
\dontrun{Waitress$new("#plot")$close()}
```

Method `get_loader()`:*Usage:*

```
Hostess$get_loader(
  preset = NULL,
  text_color = "#FFFFFF",
  center_page = FALSE,
  class = "",
  min = NULL,
  max = NULL,
  svg = NULL,
  progress_type = c("stroke", "fill"),
  fill_direction = c("btt", "ttb", "ltr", "rtl"),
  stroke_direction = c("normal", "reverse"),
  fill_color = NULL,
  stroke_color = NULL,
  ...
)
```

Arguments:

`preset` A loading bar preset, see section below.

`text_color` The color of the loading text.

`center_page` By default the hostess is centered in the middle of the screen, ideal when using it with waiter full screen, set to `FALSE` to prevent that.

`class` CSS class.

`min`, `max` Minimum and maximum representing the starting and ending points of the progress bar.

`svg` Either an svg path e.g.: `M10 10L90 10` or the path to a `.svg` file. Note that if passing the latter it must be made available to Shiny by placing it either in the `www` folder or using `[shiny::addResourcePath()]`.

`progress_type` The progress type, either `stroke` or `fill`. The former traces the path of the `svg` while the latter fills it progressively.

`fill_direction`, `stroke_direction` The direction which the progress bar should take. Whether `fill_direction` or `stroke_direction` is used depends on `progress_type`.

`fill_color`, `stroke_color` The color to use for the progress bar. Whether `fill_color` or `stroke_color` is used depends on `progress_type`.

... Any other other advanced options to pass to the loaded see the [official documentation](#).

Details: Create a hostess loading bar.

Examples:

```
\dontrun{Hostess$new()$get_loader()}
```

Method `set_loader()`:*Usage:*

```
Hostess$set_loader(loader)
```

Arguments:

loader Loader as defined by [hostess_loader()].

Details: Set a hostess loader as defined by [hostess_loader()].

Examples:

```
\dontrun{
loader <- hostess_loader()
Hostess$new()$set_loader(loader)
}
```

Method notify():*Usage:*

```
Hostess$notify(
  html = NULL,
  background_color = "transparent",
  text_color = "black",
  position = c("br", "tr", "bl", "tl")
)
```

Arguments:

html Additional HTML content of the tag or a character string.

background_color Background color of the notification.

text_color Color of text of html.

position Position of the notification on the screen. Where br is the bottom-right, tr is the top-right, bl is bottom-left, and tl is the top-left.

Details: Use the hostess as a notification. It is hidden when set tpo 100.

Examples:

```
\dontrun{Hostess$new()$notify()}
```

Method clone(): The objects of this class are cloneable with this method.

Usage:

```
Hostess$clone(deep = FALSE)
```

Arguments:

deep Whether to make a deep clone.

Examples

```
## -----
## Method `Hostess$new`
## -----

## Not run: Hostess$new()

## -----
## Method `Hostess$set`
## -----
```

```

## Not run: Hostess$new()$set(20)

## -----
## Method `Hostess$inc`
## -----

## Not run: Hostess$new()$inc(10)

## -----
## Method `Hostess$close`
## -----

## Not run: Waitress$new("#plot")$close()

## -----
## Method `Hostess$get_loader`
## -----

## Not run: Hostess$new()$get_loader()

## -----
## Method `Hostess$set_loader`
## -----

## Not run:
loader <- hostess_loader()
Hostess$new()$set_loader(loader)

## End(Not run)

## -----
## Method `Hostess$notify`
## -----

## Not run: Hostess$new()$notify()

```

hostessLoader

Loader

Description

Customise the Hostess loading bar.

Usage

```

hostess_loader(
  id = "hostess",
  preset = NULL,
  text_color = "#FFFFFF",
  center_page = FALSE,

```

```

    class = "",
    min = 0,
    max = 100,
    svg = NULL,
    progress_type = c("stroke", "fill"),
    fill_direction = c("btt", "ttb", "ltr", "rtl"),
    stroke_direction = c("normal", "reverse"),
    fill_color = NULL,
    stroke_color = NULL,
    ...
)

hostess_gradient(angle = 0, duration = 1, colors = c("red", "white", "blue"))

hostess_bubble(
  color_background = "#697682",
  color_bubble = "#f7fff7",
  count = 25,
  duration = 1
)

hostess_stripe(color1 = "#697682", color2 = "#f7fff7", duration = 1)

```

Arguments

<code>id</code>	Id of hostess (valid CSS).
<code>preset</code>	A loading bar preset, see section below.
<code>text_color</code>	The color of the loading text.
<code>center_page</code>	By default the hostess is <i>not</i> centered in the middle of the screen, centering in the middle of the page is however ideal when using it with waiter full screen, for the latter set to TRUE.
<code>class</code>	CSS class.
<code>min, max</code>	Minimum and maximum representing the starting and ending points of the progress bar.
<code>svg</code>	Either an svg path e.g.: M10 10L90 10 or the path to a .svg file. Note that if passing the latter it must be made available to Shiny by placing it either in the www folder or using <code>[shiny::addResourcePath()]</code> .
<code>progress_type</code>	The progress type, either stroke or fill. Ther former traces the path of the svg while the latter fills it progressively.
<code>fill_direction, stroke_direction</code>	The direction which the progress bar should take. Wether <code>fill_direction</code> or <code>stroke_direction</code> is used depends on <code>progress_type</code> .
<code>fill_color, stroke_color</code>	The color to use for the progress bar. Wether <code>fill_color</code> or <code>stroke_color</code> is used depends on <code>progress_type</code> .

...	Any other other advanced options to pass to the loaded see the official documentation .
angle	Angle of gradient.
duration	Duration of the loop.
colors	Color vectors composing the gradient.
color_background	The background of the color.
color_bubble	The color of the bubbles contour.
count	The number of bubbles.
color1, color2	Colors of stripes.

Presets

- line
- fan
- circle
- bubble
- rainbow
- energy
- stripe
- text

Examples

```
library(shiny)
library(waiter)

# diagonal line
path <- "M10 10L90 30"

ui <- fluidPage(
  useWaiter(),
  useHostess(),
  actionButton("draw", "redraw"),
  plotOutput("plot")
)

server <- function(input, output) {

  dataset <- reactive({
    input$draw

    hostess <- Hostess$new(min = 0, max = 10)
    hostess$set_loader <- hostess_loader(
      progress_type = "stroke",
      stroke_color = hostess_stripe()
    )
  })
}
```

```

waiter <- Waiter$new(
  "plot",
  hostess$loader()
)

waiter$show()

for(i in 1:10){
  Sys.sleep(.2)
  hostess$inc(1)
}

runif(100)

})

output$plot <- renderPlot(plot(dataset()))

}

if(interactive()) shinyApp(ui, server)

```

htrr_progress

Waitress with htrr

Description

Use a waitress progress bar with htrr requests. Simply use 'htrr_progress' where you would use [htrr::progress].

Usage

```
htrr_progress(object, type = c("down", "up"), pre = NULL, post = NULL)
```

Arguments

object	The waitress or attendant object.
type	Type of progress to display: either number of bytes uploaded or downloaded. Passed to [htrr::progress].
pre, post	Pre and callback functions to run before the progress starts or once it is done.

Examples

```

## Not run:
cap_speed <- htrr::config(max_recv_speed_large = 10000)

htrr::GET(
  "http://httpbin.org/bytes/102400",

```

```

    htr_progress(w),
    cap_speed
  )

  ## End(Not run)

```

```

preview_spinner      Preview spinner

```

Description

Allows previewing spinners in web browser or RStudio Viewer.

Usage

```
preview_spinner(spinner, bg_color = "black")
```

Arguments

```

spinner      A waiter link{spinner}.
bg_color     Background color.

```

Examples

```
if(interactive()) preview_spinner(spin_1())
```

```

spinners            Spinners

```

Description

Spinkit spinners to use with [waiter_show](#).

Usage

```

spin_rotating_plane()

spin_fading_circles()

spin_folding_cube()

spin_double_bounce()

spin_wave()

```

spin_wandering_cubes()
spin_pulse()
spin_chasing_dots()
spin_three_bounce()
spin_circle()
spin_rotate()
spin_solar()
spin_orbit()
spin_squares()
spin_cube_grid()
spin_circles()
spin_orbiter()
spin_pixel()
spin_flower()
spin_dual_ring()
spin_heart()
spin_ellipsis()
spin_facebook()
spin_hourglass()
spin_ring()
spin_ripple()
spin_terminal()
spin_loader()
spin_throbber()

spin_refresh()
spin_heartbeat()
spin_gauge()
spin_3k()
spin_wobblebar()
spin_atebits()
spin_whirly()
spin_flowers()
spin_dots()
spin_3circles()
spin_plus()
spin_pulsar()
spin_hexdots()
spin_inner_circles()
spin_pong()
spin_timer()
spin_ball()
spin_dual_circle()
spin_seven_circle()
spin_clock()
spin_pushing_shapes()
spin_fill()
spin_rhombus()
spin_balance()

```
spin_square_circle()
spin_circle_square()
spin_puzzle()
spin_half()
spin_loaders(id = 1, color = "white", style = NULL)
spin_1()
spin_2()
spin_3()
spin_4()
spin_5()
spin_6()

bs4_spinner(
  style = c("spin", "grow"),
  color = c("primary", "secondary", "success", "danger", "warning", "info", "light",
            "dark")
)

bs5_spinner(
  style = c("spin", "grow"),
  color = c("primary", "secondary", "success", "danger", "warning", "info", "light",
            "dark")
)

spin_google()
```

Arguments

<code>id</code>	The spinner identifier, an integer between 1, and 42.
<code>color</code>	Desired color of spinner.
<code>style</code>	CSS style to apply to spinner.

Details

Much of the CSS used is to provide those spinners. One can greatly reduce the load on the browser by only sourcing the CSS for the spinners required. You can find out which CSS kits are required to load by using the spinner in the R console as shown in the example. This prints the kit and instructions to only source the required file.

Value

An object of class spinner.

Examples

```
spin_rotating_plane()
```

steward

Steward

Description

A colorful steward to work with the [waiter](#).

Usage

```
useSteward(
  colors = c("#ee7752", "#e73c7e", "#23a6d5", "#23d5ab"),
  speed = 30,
  angle = -45
)
```

```
use_steward(
  colors = c("#ee7752", "#e73c7e", "#23a6d5", "#23d5ab"),
  speed = 30,
  angle = -45
)
```

Arguments

colors	Color palette forming gradient.
speed	Seconds it takes to loop over colors.
angle	Degrees at which colors slide.

transparent

Transparency

Description

A convenience function to create a waiter with transparent background.

Usage

```
transparent(alpha = 0)
```

Arguments

alpha Alpha channel where 0 is completely transparent and 1 is opaque.

Examples

```
transparent()
```

<code>triggerWaiter</code>	<i>Trigger Waiter</i>
----------------------------	-----------------------

Description

A a trigger to a waiting screen from the UI.

Usage

```
triggerWaiter(
  el,
  id = NULL,
  html = NULL,
  color = NULL,
  image = "",
  fadeout = FALSE,
  on = "click",
  hide_on_render = !is.null(id),
  hide_on_error = !is.null(id),
  hide_on_silent_error = !is.null(id)
)
```

Arguments

<code>el</code>	Element that triggers the waiter.
<code>id</code>	Id of element to hide or element on which to show waiter over.
<code>html</code>	HTML content of waiter, generally a spinner, see spinners .
<code>color</code>	Background color of loading screen.
<code>image</code>	Path to background image.
<code>fadeout</code>	Use a fade out effect when the screen is removed. Can be a boolean, or a numeric indicating the number of milliseconds the effect should take.
<code>on</code>	The event that triggers the waiter.
<code>hide_on_render</code>	Set to TRUE to automatically hide the waiter when the plot in <code>id</code> is drawn. Note the latter will only work with shiny plots, tables, htmlwidgets, etc. but will not work with arbitrary elements.
<code>hide_on_error</code> , <code>hide_on_silent_error</code>	Whether to hide the waiter when the underlying element throws an error. Silent error are thrown by req and validate .

Examples

```

library(shiny)
library(waiter)

ui <- fluidPage(
  useWaiter(),
  triggerWaiter(
    actionButton(
      "generate",
      "Generate Plot"
    )
  ),
  plotOutput("plot")
)

server <- function(input, output){
  output$plot <- renderPlot({
    input$generate
    Sys.sleep(3)
    plot(runif(50))
  })
}

if(interactive())
  shinyApp(ui, server)

```

`useAttendant`*Attendant Progress Dependencies*

Description

Include in anywhere your shiny UI to import the dependencies required to run attendant progress.

Usage

```
useAttendant()
```

`waiter`*Waiter*

Description

Pragmatically show and hide loading screens.

Usage

```
use_waiter(spinners = NULL, include_js = TRUE)

useWaiter(spinners = NULL, include_js = TRUE)

waiter_use(spinners = 1:7, include_js = TRUE)

waiter_show(
  id = NULL,
  html = spin_1(),
  color = "#333e48",
  logo = "",
  image = "",
  hide_on_render = !is.null(id)
)

waiter_show_on_load(html = spin_1(), color = "#333e48", image = "", logo = "")

waiterShowOnLoad(html = spin_1(), color = "#333e48", image = "", logo = "")

waiter_preloader(
  html = spin_1(),
  color = "#333e48",
  image = "",
  fadeout = FALSE,
  logo = ""
)

waiterPreloader(
  html = spin_1(),
  color = "#333e48",
  image = "",
  fadeout = FALSE,
  logo = ""
)

waiter_hide_on_render(id)

waiterHideOnRender(id)

waiter_on_busy(
  html = spin_1(),
  color = "#333e48",
  logo = "",
  image = "",
  fadeout = FALSE
)
```

```
waiterOnBusy(
  html = spin_1(),
  color = "#333e48",
  logo = "",
  image = "",
  fadeout = FALSE
)

waiter_hide(id = NULL)

waiter_update(id = NULL, html = NULL)
```

Arguments

<code>spinners</code>	Deprecated argument. Spinners to include. By default all the CSS files for all spinners are included you can customise this only that which you need in order to reduce the amount of CSS that needs to be loaded and improve page loading speed. There are 7 spinner kits. The spinner kit required for the spinner you use is printed in the R console when using the spinner. You can specify a single spinner kit e.g.: 1 or multiple spinner kits as a vector e.g.: <code>c(1, 3, 6)</code> .
<code>include_js</code>	Deprecated argument, no longer needed.
<code>id</code>	Id of element to hide or element on which to show waiter over.
<code>html</code>	HTML content of waiter, generally a spinner, see spinners .
<code>color</code>	Background color of loading screen.
<code>logo</code>	Path to logo to display. Deprecated.
<code>image</code>	Path to background image.
<code>hide_on_render</code>	Set to TRUE to automatically hide the waiter when the plot in <code>id</code> is drawn. Note the latter will only work with shiny plots, tables, <code>htmlwidgets</code> , etc. but will not work with arbitrary elements.
<code>fadeout</code>	Use a fade out effect when the screen is removed. Can be a boolean, or a numeric indicating the number of milliseconds the effect should take.

Functions

- `use_waiter` and `waiter_use`: waiter dependencies to include anywhere in your UI but ideally at the top.
- `waiter_show_on_load`: Show a waiter on page load, before the session is even loaded, include in UI *after* `use_waiter`.
- `waiter_show`: Show waiting screen.
- `waiter_hide`: Hide any waiting screen.
- `waiter_on_busy`: Automatically shows the waiting screen when the server is busy, and hides it when it goes back to idle.
- `waiter_update`: Update the content `html` of the waiting screen.
- `waiter_hide_on_render`: Hide any waiting screen when the output is drawn, useful for outputs that take a long time to draw, *use in ui*.

- `waiter_preloader`: Shows the waiter on load and automatically removes it once all the UI is rendered, only runs on the first load of the app.

Examples

```
library(shiny)

ui <- fluidPage(
  useWaiter(), # dependencies
  waiterShowOnLoad(spin_fading_circles()), # shows before anything else
  actionButton("show", "Show loading for 5 seconds")
)

server <- function(input, output, session){
  waiter_hide() # will hide *on_load waiter

  observeEvent(input$show, {
    waiter_show(
      html = tagList(
        spin_fading_circles(),
        "Loading ..."
      )
    )
    Sys.sleep(3)
    waiter_hide()
  })
}

if(interactive()) shinyApp(ui, server)
```

waiterClass

Waiter R6 Class

Description

Create a waiter to then show, hide or update its content.

Details

Create an object to show a waiting screen on either the entire application or just a portion of the app by specifying the id. Then show, then hide or meanwhile update the content of the waiter.

Active bindings

`fadeout` Set or get the fade out
`color` Set or get the background color
`image` Set of get the background image
`session` Set or get the shiny session
`html` Set or get the html content

Methods**Public methods:**

- `Waiter$new()`
- `Waiter$show()`
- `Waiter$hide()`
- `Waiter$update()`
- `Waiter$print()`
- `Waiter$clone()`

Method new():*Usage:*

```
Waiter$new(
  id = NULL,
  html = NULL,
  color = NULL,
  logo = NULL,
  image = "",
  fadeout = FALSE,
  hide_on_render = !is.null(id),
  hide_on_error = !is.null(id),
  hide_on_silent_error = !is.null(id)
)
```

Arguments:

`id` Id, or vector of ids, of element on which to overlay the waiter, if NULL the waiter is applied to the entire body.

`html` HTML content of waiter, generally a spinner, see [spinners](#) or a list of the latter.

`color` Background color of loading screen.

`logo` Logo to display. Deprecated.

`image` Path to background image of loading screen.

`fadeout` Use a fade out effect when the screen is removed. Can be a boolean, or a numeric indicating the number of milliseconds the effect should take.

`hide_on_render` Set to TRUE to automatically hide the waiter when the element in `id` is drawn. Note the latter will work with shiny plots, tables, htmlwidgets, etc. but will not work with arbitrary elements.

`hide_on_error`, `hide_on_silent_error` Whether to hide the waiter when the underlying element throws an error. Silent error are thrown by [req](#) and [validate](#).

Details: Create a waiter.

Examples:

```
\dontrun{Waiter$new()}
```

Method show():*Usage:*

```
Waiter$show()
```

Details: Show the waiter.

Method hide():

Usage:

Waiter\$hide()

Details: Hide the waiter.

Method update():

Usage:

Waiter\$update(html = NULL)

Arguments:

html HTML content of waiter, generally a spinner, see [spinners](#).

Details: Update the waiter's html content.

Method print():

Usage:

Waiter\$print()

Details: print the waiter

Method clone(): The objects of this class are cloneable with this method.

Usage:

Waiter\$clone(deep = FALSE)

Arguments:

deep Whether to make a deep clone.

Examples

```
## -----
## Method `Waiter$new`
## -----

## Not run: Waiter$new()
```

waiterTheme

Define a Theme

Description

Define a theme to be used by all waiter loading screens. These can be overridden in individual loading screens.

Usage

```
waiter_set_theme(html = spin_1(), color = "#333e48", logo = "", image = "")

waiter_get_theme()

waiter_unset_theme()
```

Arguments

html	HTML content of waiter, generally a spinner, see spinners .
color	Background color of loading screen.
logo	Path to logo to display. Deprecated.
image	Path to background image.

 waitress

Waitress

Description

Programmatically show and hide loading bars.

Usage

```
useWaitress(color = "#697682", percent_color = "#333333")

use_waitress(color = "#697682", percent_color = "#333333")
```

Arguments

color, percent_color	Color of waitress and color of percent text shown when theme is set to overlay-percent.
----------------------	---

Details

You can pipe the methods with `$. Waitress$new()` and `call_waitress()` are equivalent.

Examples

```
library(shiny)

ui <- fluidPage(
  useWaitress("red"), # dependencies
  sliderInput("set", "percentage", 1, 100, step = 5, value = 1)
)

server <- function(input, output, session){
```

```
w <- Waitress$
  new()$ # call a waitress
  start() # start waitress

  observeEvent(input$set, {
    w$set(input$set) # set at percentage
  })
}

if(interactive()) shinyApp(ui, server)
```

waitressClass

Waitress R6 Class

Description

Create a waitress (progress bar) and programmatically set or increase its percentage, then hide it when done.

Active bindings

max Maximum value of the bar.

min Minimum value of the bar.

Methods

Public methods:

- [Waitress\\$new\(\)](#)
- [Waitress\\$start\(\)](#)
- [Waitress\\$notify\(\)](#)
- [Waitress\\$set\(\)](#)
- [Waitress\\$auto\(\)](#)
- [Waitress\\$inc\(\)](#)
- [Waitress\\$close\(\)](#)
- [Waitress\\$getMin\(\)](#)
- [Waitress\\$getMax\(\)](#)
- [Waitress\\$getValue\(\)](#)
- [Waitress\\$print\(\)](#)
- [Waitress\\$clone\(\)](#)

Method `new()`:

Usage:

```
Waitress$new(
  selector = NULL,
  theme = c("line", "overlay", "overlay-radius", "overlay-opacity", "overlay-percent"),
  min = 0,
  max = 100,
  infinite = FALSE,
  hide_on_render = FALSE
)
```

Arguments:

selector Element selector to apply the waitress to, if NULL then the waitress is applied to the whole screen.

theme A valid theme, see function usage.

min, max Minimum and maximum representing the starting and ending points of the progress bar.

infinite Set to TRUE to create a never ending loading bar, ideal when you cannot compute increments or assess the time it might take before the loading bar should be removed.

hide_on_render Set to TRUE to automatically hide the waitress when the element in **id** is rendered. Note the latter will work with shiny plots, tables, htmlwidgets, etc. but will not work with arbitrary elements.

color, percent_color Color of waitress and color of percent text shown when theme is set to overlay-percent.

Details: Create a waitress.

Examples:

```
\dontrun{Waitress$new("#plot")}
```

Method start():*Usage:*

```
Waitress$start(
  html = NULL,
  background_color = "transparent",
  text_color = "black"
)
```

Arguments:

html HTML content to show over the waitress, accepts htmltools and shiny tags.

background_color The background color of the html.

text_color The color of the html content.

Details: Start the waitress.

Examples:

```
\dontrun{Waitress$new("#plot")$start()}
```

Method notify():*Usage:*

```
Waitress$notify(
  html = NULL,
  background_color = "white",
  text_color = "black",
  position = c("br", "tr", "bl", "tl")
)
```

Arguments:

`html` HTML content to show over the waitress, accepts `htmltools` and `shiny` tags.

`background_color` The background color of the html.

`text_color` The color of the html content.

`position` Position of the notification on the screen. Where `br` is the bottom-right, `tr` is the top-right, `bl` is bottom-left, and `tl` is the top-left.

Details: Show the waitress as a notification.

Examples:

```
\dontrun{Waitress$new()$notify()}
```

Method set():*Usage:*

```
Waitress$set(value)
```

Arguments:

`value` Value to set waitress to.

Details: Set the waitress to a specific percentage.

Examples:

```
\dontrun{Waitress$new("#plot")$set(20)}
```

Method auto():*Usage:*

```
Waitress$auto(value, ms)
```

Arguments:

`value` Value to set waitress to.

`ms` Number of Milliseconds

Details: Automatically start and end the waitress.

Examples:

```
\dontrun{Waitress$new("#plot")$auto(20, 2000)}
```

Method inc():*Usage:*

```
Waitress$inc(value)
```

Arguments:

`value` Value to increase waitress to.

Details: Increase the waitress by a percentage.

Examples:

```
\dontrun{Waitress$new("#plot")$inc(30)}
```

Method close():

Usage:

```
Waitress$close()
```

Details: Close the waitress.

Examples:

```
\dontrun{Waitress$new("#plot")$close()}
```

Method getMin():

Usage:

```
Waitress$getMin()
```

Details: Get minimum value

Method getMax():

Usage:

```
Waitress$getMax()
```

Details: Get maximum value

Method getValue():

Usage:

```
Waitress$getValue()
```

Details: Get current value

Method print():

Usage:

```
Waitress$print()
```

Details: Print the waitress.

Examples:

```
\dontrun{Waitress$new("#plot")$hide()}
```

Method clone(): The objects of this class are cloneable with this method.

Usage:

```
Waitress$clone(deep = FALSE)
```

Arguments:

deep Whether to make a deep clone.

Examples

```

## -----
## Method `Waitress$new`
## -----

## Not run: Waitress$new("#plot")

## -----
## Method `Waitress$start`
## -----

## Not run: Waitress$new("#plot")$start()

## -----
## Method `Waitress$notify`
## -----

## Not run: Waitress$new()$notify()

## -----
## Method `Waitress$set`
## -----

## Not run: Waitress$new("#plot")$set(20)

## -----
## Method `Waitress$auto`
## -----

## Not run: Waitress$new("#plot")$auto(20, 2000)

## -----
## Method `Waitress$inc`
## -----

## Not run: Waitress$new("#plot")$inc(30)

## -----
## Method `Waitress$close`
## -----

## Not run: Waitress$new("#plot")$close()

## -----
## Method `Waitress$print`
## -----

## Not run: Waitress$new("#plot")$hide()

```

Description

Report progress with attendant.

Usage

```
withProgressAttendant(
  expr,
  ...,
  session = getDefaultReactiveDomain(),
  env = parent.frame(),
  quoted = FALSE
)

setProgressAttendant(
  value = 1,
  text = NULL,
  session = getDefaultReactiveDomain()
)

incProgressAttendant(
  value = 1,
  text = NULL,
  session = getDefaultReactiveDomain()
)
```

Arguments

<code>expr</code>	The work to be done. This expression should contain calls to <code>setProgressAttendant</code> or <code>incProgressAttendant</code> .
<code>...</code>	Passed to the Attendant constructor (<code>'Attendant\$new()'</code>).
<code>session</code>	The Shiny session object, as provided by <code>'shinyServer'</code> to the server function. The default is to automatically find the session by using the current reactive domain.
<code>env</code>	The environment in which <code>'expr'</code> should be evaluated.
<code>quoted</code>	Whether <code>'expr'</code> is a quoted expression (this is not common).
<code>value</code>	Value to set the waitress to or increase it by.
<code>text</code>	Text to display on the progress bar.

`withProgressWaitress` *Report Progress Waitress*

Description

Report progress with waitress.

Usage

```
withProgressWaitress(
  expr,
  ...,
  session = getDefaultReactiveDomain(),
  env = parent.frame(),
  quoted = FALSE
)

setProgressWaitress(value = 1, session = getDefaultReactiveDomain())

incProgressWaitress(value = 1, session = getDefaultReactiveDomain())
```

Arguments

expr	The work to be done. This expression should contain calls to <code>setProgressWaitress</code> or <code>incProgressWaitress</code> .
...	Passed to the <code>Waitress</code> constructor (<code>'Waitress\$new()'</code>).
session	The Shiny session object, as provided by <code>'shinyServer'</code> to the server function. The default is to automatically find the session by using the current reactive domain.
env	The environment in which <code>'expr'</code> should be evaluated.
quoted	Whether <code>'expr'</code> is a quoted expression (this is not common).
value	Value to set the waitress to or increase it by.

withWaiter

With Waiter

Description

Adds a waiter to a reactive UI element. The waiter is displayed when the element is invalidated then is removed when the element receives a new value.

Usage

```
withWaiter(element, html = spin_1(), color = "#333e48", image = "")
```

Arguments

element	A reactive element, e.g.: <code>'uiOutput'</code> , or <code>'plotOutput'</code> .
html	HTML content of waiter, generally a spinner, see spinners .
color	Background color of loading screen.
image	Path to background image.
